

Which style sounds like you?

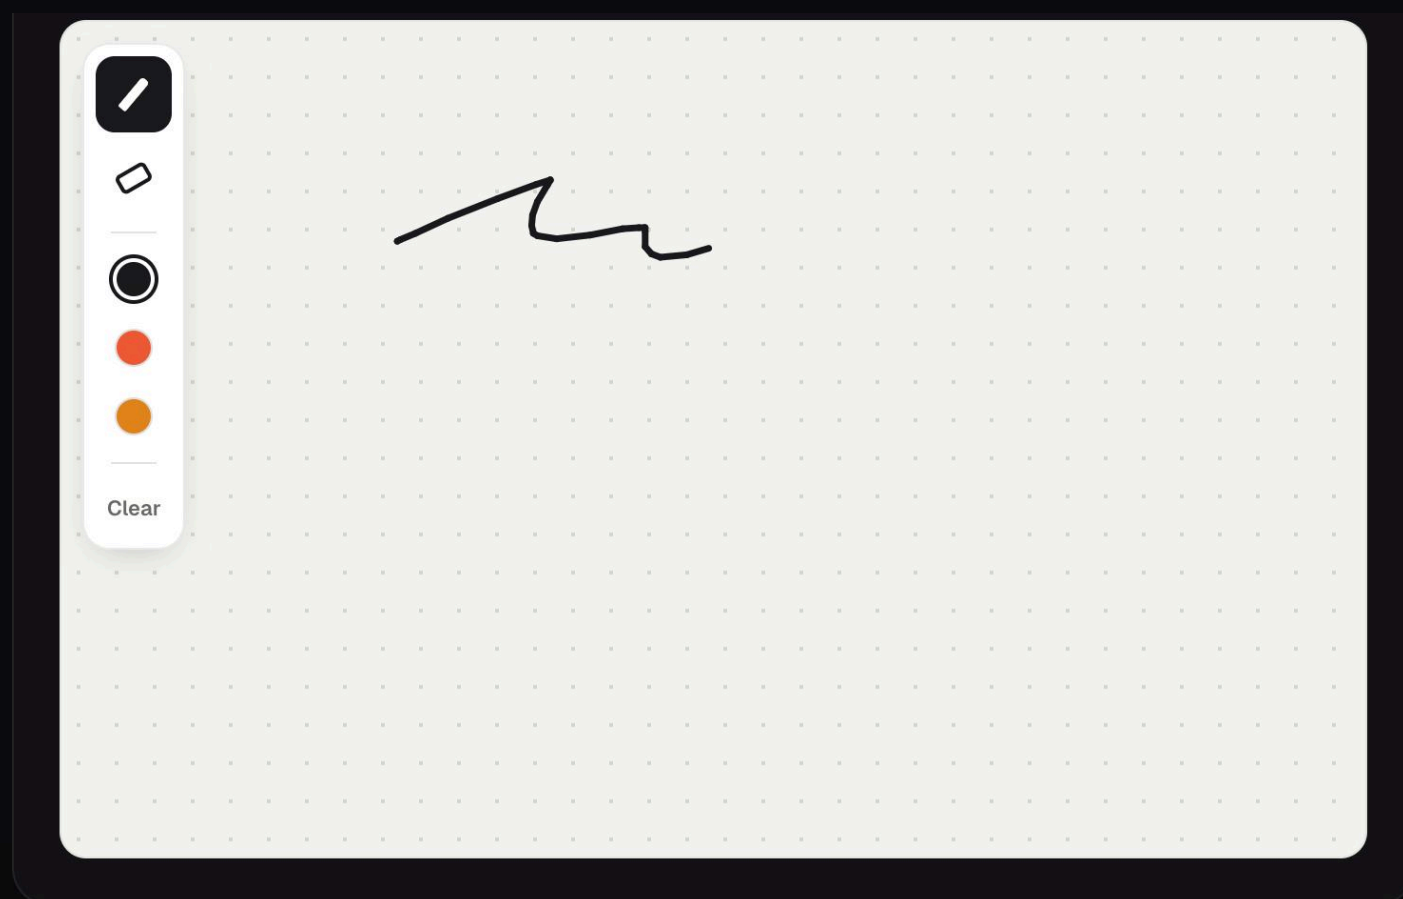

Pick the one that fits best. We'll show you how you click with everyone else.

name field

division

1-2 sentences about yourself as they relate to your chemistry style.

draw something to reflect your style (make into a hello, my name is style card but with chemistry style names". only black marker

food for thought: all of this data needs to be captured into a js file and then used to populate the proceeding dashboard. there will be multiple users on at once, so not sure what is the best approach. currently can only be simple HTML/CSS/and JS no over-complex calls or whatever. For demo purposes, its ok if i stop here and then show something with dummy data. BUT KEEP THIS INFO SAVED soemwhere!
